

# Configuring the General Configuration Bundle Settings

Last Modified on 08/07/2020 1:08 pm EDT

The general settings allows you to configure some of the basic settings for the user such as browser restrictions, download limits, pin requirements, and more.

Option	Description
Device Browser Restrictions	Enables websites to be blacklisted or whitelisted.
Download Subscribed Content Only	Allows users to download content only to which they have subscribed.
Enable JavaScript Bridge	Allows developers to use the JavaScript bridge API and connect to the bigtincan hub.
Enable Thumbnails	Allows users to download and display thumbnails for content.
Require Android File Encryption	Enables encryption of content for Android devices.
Cellular Download Maximum (MB)	Sets the download limit for content downloaded using cellular network. Specify the limit in the text space.
WiFi Download Maximum (MB)	Sets the download limit for content downloaded using WiFi. Specify the limit in the text space.
Pin Code	Enables the requirement of entering the device code after a period of inactivity. Also, the user must enter the code even after closing and reopening the app.
