

App Permissions

Last Modified on 10/23/2019 12:58 pm EDT

From time to time you may want to change user permissions to either allow or deny the access to Zunos iOS app and the Zunos WebApp. For whatever reason this may be, the process is quite straight forward and can be achieved by using the Zunos Admin Portal.

Please use the following steps to disable access to the Zunos Application:

Restricting app access per user

1. Log into the Zunos Admin Portal
2. Go to the Users module
3. To prevent access to a single user, open that users account, scroll down and change the setting called **Client Application Access**.
4. Alternatively, to restrict just the user access from webapp, toggle setting **Webapp Client Access**
5. Click the **Save** option that appears to the right of the Account Settings header

Restricting app access for a group of users

You may also adjust this setting for many users at a time

1. Log into the Zunos Admin Portal
2. Go to the Users module
3. Tag the users by checking the box beside the user in the list
4. From the bulk actions toolbar choose **More** and then **Disable Client Access**
5. You can also bulk action **Disable Webapp Client Access**

Users

The screenshot shows a user management interface with a table of users. A context menu is open over the table, listing actions for the selected users. Red arrows point from the 'Disable Client Access' and 'Disable Webapp Client Access' options in the menu to the checkboxes of Greg Daren, Barry Ga, and Eddy Murphy in the table.

	Name ▲	Group	Last Login	Sign Up
<input type="checkbox"/>	Bella Bell	Management	10/05/2017 1:55 PM	31/01/2017 4:18 PM
<input type="checkbox"/>	Casey Chan	Engineering	15/05/2017 12:39 PM	31/01/2017 4:19 PM
<input type="checkbox"/>	Devin Dale		17/05/2017 3:14 PM	31/01/2017 4:20 PM
<input checked="" type="checkbox"/>	Greg Daren	Management, CSX, Engineering, User	22/03/2017 3:49 PM	20/02/2017 12:13 PM
<input type="checkbox"/>	Fred Flintstone	Engineering	2/02/2017 3:32 PM	31/01/2017 4:25 PM
<input checked="" type="checkbox"/>	Barry Ga		19/05/2017 4:18 PM	31/01/2017 4:27 PM
<input type="checkbox"/>	Indy La		23/02/2017 2:10 PM	31/01/2017 4:24 PM
<input type="checkbox"/>	★ Amanda Lum		19/05/2017 5:11 PM	30/01/2017 1:52 PM
<input checked="" type="checkbox"/>	Eddy Murphy	User	20/03/2017 9:19 AM	31/01/2017 4:21 PM
<input type="checkbox"/>	★ Houmer Omidvar		10/05/2017 11:29 AM	27/03/2017 10:14 AM

Context Menu Options:

- Send Welcome Email
- Send Password Reset
- Enable Client Access
- Disable Client Access
- Enable Webapp Client Access
- Disable Webapp Client Access
- Make Admin

6. Lastly, user access to the Zunos iOS app and WebApp can be disabled as part of the user import process. Please check out [the user import article here](#) for more information on the bulk import options.

Note: To enable the user access either per user or for a group, simply repeat the steps but instead of taking actions to disable it, enable it.
