

Using Clear Slide's Integrated Meeting Audio

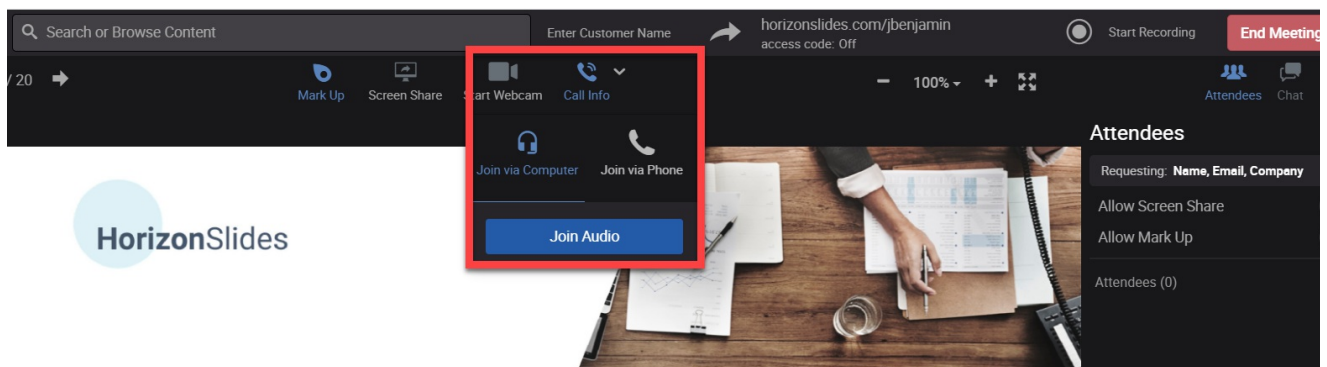

Last Modified on 05/11/2021 1:17 pm EDT

ClearSlide provides integrated conference lines directly in the meeting interface to make connecting with your customers even easier. Click on the "Call Info" phone icon at the top of your meeting screen to access both dial-in numbers and computer audio. Any viewers have access to the same options on your meeting link.

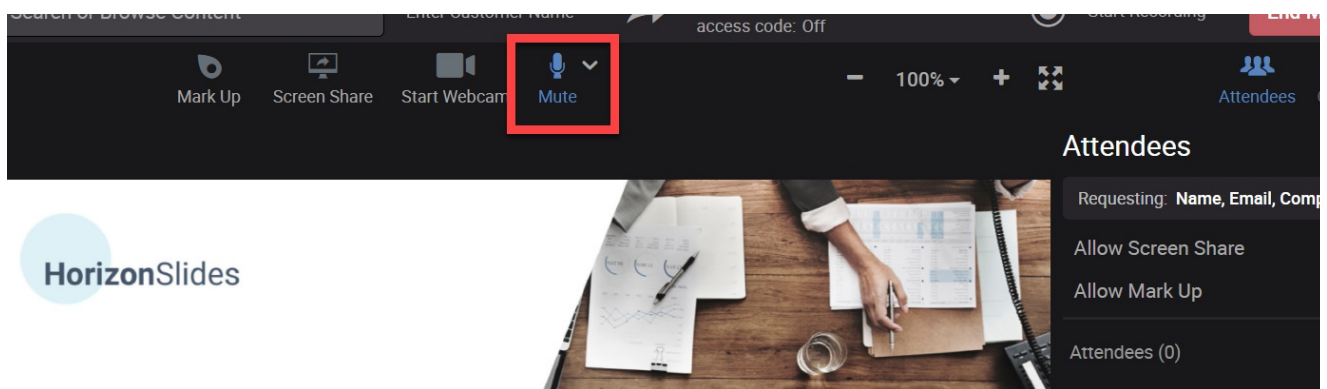

Connecting:

Join via your computer audio

Click the headset icon, then click "Join Audio" to connect via your computer. Our audio will use the input/output devices selected in your browser.

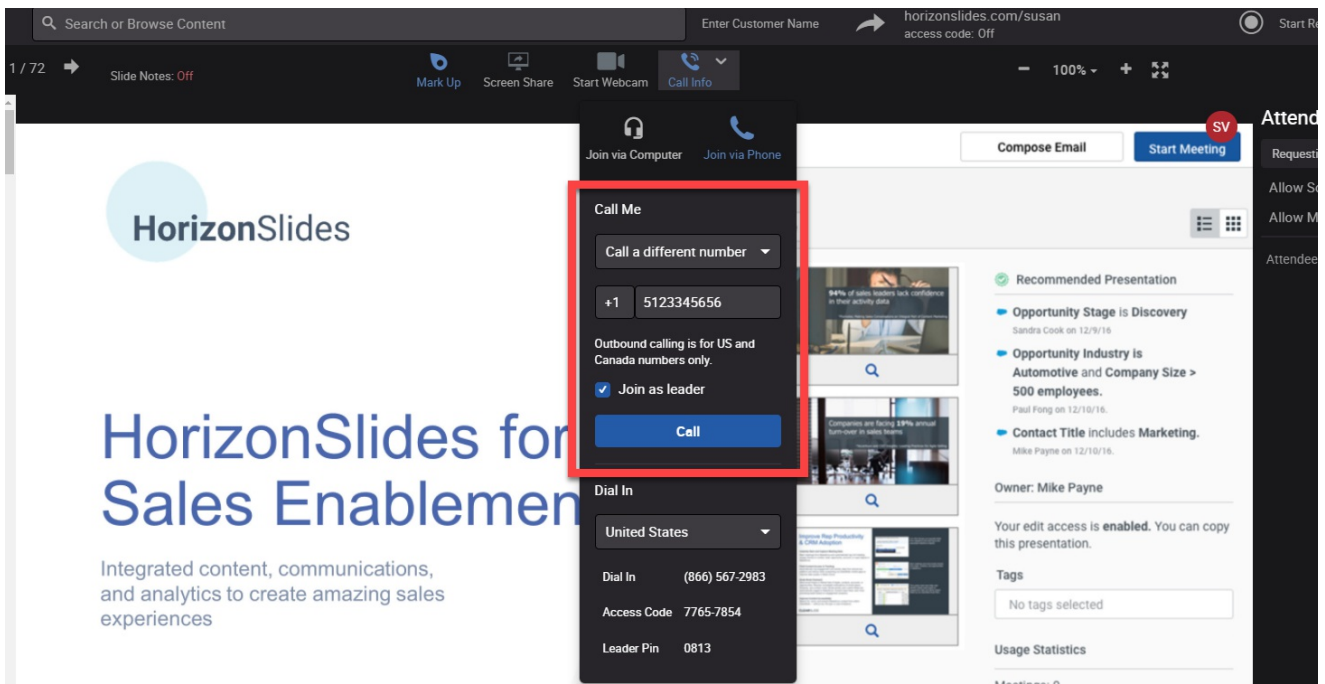

Need to mute? Click on the microphone icon to mute and unmute yourself.

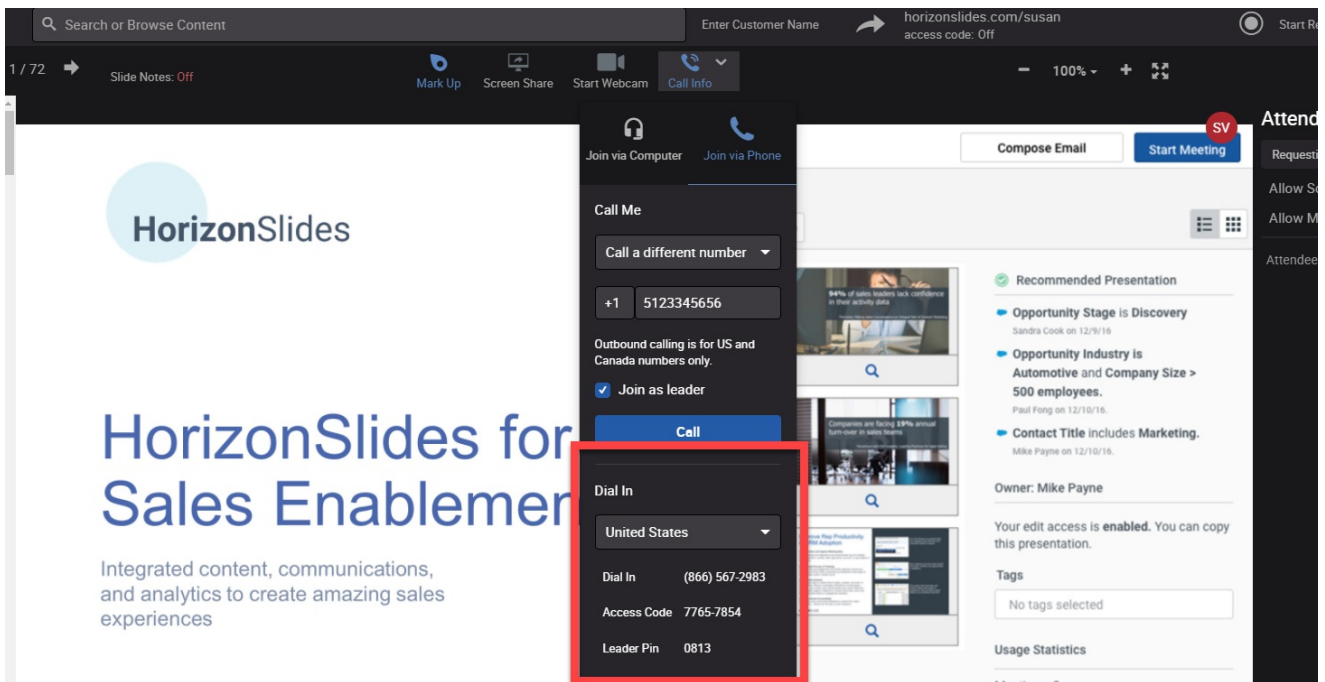

Join on your phone

We can call you! Click the phone icon, enter your phone number, and click "Call". We'll call you directly so you can join the conference without needing to remember the access codes, leader pin etc. Don't forget to click "Join as leader" if you're the meeting host!

Need to mute? Mute your line via the controls on your phone.

If you'd prefer, you can also dial into one of our conferencing phone numbers listed under "Dial In". We have toll-free and local lines supporting over 80 countries.

Troubleshooting:

Don't see the phone icon? Your internal admin has likely disabled conferencing for your account. Reach out to them to request access.

Looking for more international conference lines? The dial-in numbers you have access to are managed by your internal admin. ClearSlide provides conference lines for over 80 countries, so reach out to your admin if you don't see what you're looking for. Point them [here](#) for instructions on adding new numbers.
