

How can I Disable a Link I've Created?

Last Modified on 05/25/2021 10:10 am EDT

Sharing content via ClearSlide allows you to revoke access to the link's content at any time. You can also [change the included content](#) or [add additional access controls](#) to your link at any time without updating the URL or notifying your recipients.

If you'd like to disable your link completely, start by finding the link you'd like to disable.

1. Find the activity card on your [My ClearSlide](#) activity feed.
2. Use the [Emails and Links dashboard](#) and click into the link record to view the details.

Use the toggle on the right to disable the link, then hit Save Changes:

The screenshot shows the HorizonSlides interface for a link record. The top navigation bar includes the HorizonSlides logo, a search bar, and user profile icons. The main content area displays the link details for 'Company: Southern Mountain Bank (Opp: Southern Mountain Bank - US East \$250K)'. The URL is 'https://horizondemo.com/view/mail?iID=7jdZMSPJCW8jKqHtcc74'. The 'Summary' section shows three slides: 'Horizon Slides for Remote Selling Pitch Deck', '94% of world-class sales organizations know why top performers are successful', and 'HorizonSlides Post Discovery Pitch Deck'. The 'Details' panel on the right shows the 'Link status' as 'Enabled' with a toggle switch. Other details include 'Created' (05/10/2021 11:16 AM), 'Owner' (Tony Ramirez), 'Customer' (Southern Mount...), and 'Recipient name' (Dorian Chambers). The 'Options' section includes checkboxes for 'Send view alerts', 'Don't allow forwards', and 'Include lead form' (checked). The 'Default Public Link Form' is set to 'Default Public Link Form' and 'Show form on slide #' is set to '1'. The 'Save Changes' button is highlighted with a red box.

Changes are applied instantly once you hit the "Save Changes" button:

This screenshot shows the same HorizonSlides interface as the previous one, but with the 'Save Changes' button highlighted with a red box and a red arrow pointing to it. The 'Link status' toggle is still 'Enabled'. The 'Save Changes' button is now highlighted with a red box, and a red arrow points to it from the bottom left.
